Quality Endorsed Company QEC 4234 • Manufactured to Australian Standards

ICON-SEPTECH - THE COMPANY

... Innovation Pre-Cast

Our Business – Service, Quality, Value

Icon-Septech is a vibrant privately owned Australian business. It combines businesses from across Australia with approximately 100 employees whose experience dates back to the 1970's. Today we operate throughout Australia as well as export product to overseas markets.

Our key point of differentiation is that we bring expertise from four major product groups to provide the complete solution for our customers.

Precast Concrete – Innovation Precast

The company manufactures precast concrete products in Brisbane, Melbourne, Numurkah and Perth. It specialises in products for the civil contracting, drainage, sewage treatment, rural, telecommunications and electrical markets. Our precast capability is also backed up by design and in-house manufacture of moulds through our Engineering business, Numurkah Engineering.

Metal Access Covers and Grates – One Stop Supply Shop

The company designs and imports a range of access covers and grates including exclusive innovative designs that offer superior long-term performance. The company holds several Standards Mark licenses for these products assuring independent quality verification to Australian Standards. Suppliers are chosen on their ability to supply to international quality standards and their proven track record. We strongly believe that value is achieved through a quality product that offers superior performance and reliability over the life of the product.

Pipeline and Fittings Systems – Systems & Integration

Icon-Septech offer a comprehensive pipeline and fittings system for a range of markets. These systems can be supplied in Concrete, PE, PP, PVC and Ductile Iron. These are fully standards marked and independently audited to assure quality compliance with Australian Standards.

We can recommend solutions that integrate and can be packaged with Precast Concrete, Access Covers and Grates to provide superior value when compared to incumbent manufacturers.

Environmental – Concepts and Technologies

Icon-Septech offers a range of environmental solutions including, wastewater and stormwater treatment.

More than 20,000 Septech wastewater treatment systems are in use throughout Australia, New Zealand, Ireland, United Arab Emirates and Malaysia. Icon-Septech also services a large number of its systems, and through this experience has developed intelligent microprocessor control to reduce operating costs, improve reliability and effluent quality. The company can offer turn-key commercial projects of up to 100,000 litres per day capacity.

The company also offers a range of stormwater pollution control devices that are manufactured in-house in conjunction with our technology partners.

Engineering - Customised Solutions

Icon-Septech acquired Numurkah Engineering in 2007 to provide precast mould-building and general fabrication services. Numurkah Engineering has considerable expertise in designing quality moulds that facilitate efficient production of quality precast products.

Our engineering abilities now extent to thermo-plastic fabrication, including PVC, PE, PP sheets, pipes and fittings.
